

GEORGIOS LYMPEROPOULOS

Lead Engineer | Frontend Architect | React / Typescript | AI Engineering & Developer Productivity

Arta, Greece • glympe77@gmail.com • +30 6944362386 • Portfolio • GitHub

PROFILE

Lead Frontend Engineer with 10+ years of experience designing and modernizing complex web platforms with React, TypeScript, Next.js, micro-frontends, shared packages, and design systems. Strong track record leading frontend architecture for enterprise and public-sector products, translating complex business flows into maintainable user experiences, and guiding teams through reviews, standards, mentoring, estimations, and delivery practices.

Currently expanding into AI Product Engineering and Developer Productivity, with hands-on work around Claude, Codex, MCP integrations, AI-assisted code review, RAG-style workflows, and LLM-powered engineering automation.

IMPACT SNAPSHOT

Enterprise modernization Led frontend modernization for EUIPO front-office applications, including public services, trademark/design filing flows, and complex form platforms.	Frontend architecture Designed reusable React/TypeScript patterns using micro-frontends, custom npm packages, shared form/UI components, and optimistic UI.
Team leadership Provided technical direction in a 10+ person delivery environment through mentoring, reviews, standards, hiring support, and workshops.	AI engineering direction Built MCP and LLM-powered workflow prototypes, including Jira-oriented tooling, AI code review concepts, and developer productivity experiments.

AI ENGINEERING & DEVELOPER PRODUCTIVITY

- Built and Dockerized an MCP server prototype for Jira workflows, tested with MCP Inspector and integrated with VS Code / Copilot-style development flows.
- Explored AI-assisted React code review using Claude, Codex, skills, reusable architecture rules, accessibility criteria, and frontend quality standards.
- Worked with RAG-style and knowledge-base patterns for architecture guidance, onboarding, engineering decision support, and technical documentation.
- Building an AI Code Review Agent concept for React/TypeScript using Python, FastAPI, Pydantic, RAG over frontend architecture rules, MCP integrations, and evaluation datasets.
- Contributed to AI product prototype ideas around feedback classification and categorization using LLM workflows, Vertex AI / Gemini concepts, and BigQuery-based data flows.

PROFESSIONAL EXPERIENCE

Team Leader / Lead Frontend Engineer | Netcompany Intrasoft

July 2020 to Present | Athens, Greece | Client: European Union Intellectual Property Office

Frontend leadership and architecture ownership for EUIPO front-office modernization, covering public-facing services, complex registration flows, and enterprise-scale delivery practices.

- Led frontend modernization for EUIPO applications, including public website experiences and complex digital filing flows for trademarks and designs.
- Designed scalable React and TypeScript architecture using micro-frontends, Module Federation concepts, custom npm packages, and shared UI/form components.
- Introduced reusable optimistic UI patterns and frontend/backend separation principles to improve responsiveness, maintainability, and delivery consistency.
- Worked with Next.js for SSR, Storyblok as a headless CMS, GraphQL/Apollo, Material UI, OIDC authentication via WSO2, Java/Spring Boot, SQL, AWS, ArgoCD, and Jenkins.
- Established and promoted frontend standards around code quality, SonarQube, pre-commit hooks, test coverage targets above 60%, and reusable review practices.
- Mentored engineers, reviewed code, supported estimations, aligned contracts with backend teams, and helped structure technical interviews and live coding exercises.

Senior Software Developer | Netcompany Intrasoft

July 2020 to 2022 | Athens, Greece

- Delivered React and TypeScript features for enterprise-grade EUIPO applications, focusing on complex form flows, state management, API integration, and UI consistency.
- Supported the transition from hands-on feature delivery to broader frontend technical ownership and architecture leadership.

Full Stack Developer | Civic UK, Remote | September 2018 to July 2020

Built and maintained React/Redux and Ruby on Rails applications, including Amazon Partner Network tooling, gender pay gap reporting dashboards with Highcharts, WordPress plugins, WooCommerce templates, and interactive EU digital books.

Senior Frontend Developer | Boosted Boards, Remote, USA | January 2019 to January 2020

Maintained and optimized the Boosted Boards website using React, Redux, Apollo, GraphQL, Contentful, Scrum, and Jira.

React Native Developer | KeyBee Hosting, Remote, USA | February 2017 to September 2018

Enhanced an iOS/Android application for Airbnb hosts, including complex account connection flows with login simulation, captcha handling, two-step verification, and account validation.

Frontend React Developer | SimplyBook, Greece | December 2016 to April 2020

Built frontend features for an online car rental management platform, including landing pages, dashboards, and Stripe payment flows using React, Redux, and GitLab.

Teaching Assistant / Instructor | Matacode LLC, Remote, USA | January 2017 to January 2019

Supported students in a MySQL developer course on Udemy, answered technical questions, and created beginner-friendly guides for PHP and MySQL application development.

Earlier Roles | MeetGreek, Kukarika Apps, Ecep Technologies, Ntoulagiannakis D.I.Y Store | 2008 to 2017

Delivered web and mobile applications using Ionic, Angular, Firebase, WordPress, PHP, HTML/CSS, Ruby on Rails, JavaScript, and Bootstrap. Also managed e-commerce operations and a small sales team.

TECHNICAL SKILLS

Frontend	React, TypeScript, JavaScript, Next.js, Redux Toolkit, Context API, Material UI, Ant Design, Storyblok, GraphQL, Apollo, HTML5, CSS3, Accessibility
Architecture	Micro-frontends, Module Federation, Design Systems, Shared npm Packages, Optimistic UI, SSR, Reusable Form Architecture, Enterprise Frontend Standards
AI & Automation	Claude, Codex, MCP, LLM Workflows, AI-assisted Development, AI Code Review, Agentic Tooling, Prompt Engineering, RAG Concepts, Vertex AI / Gemini
Backend & APIs	Java, Spring Boot, SQL, REST APIs, GraphQL, Ruby on Rails, PHP, MySQL, MongoDB, Firebase
Quality & Delivery	SonarQube, Jest, Vitest, Testing Library, Git, Jira, GitLab, CI/CD, Jenkins, ArgoCD, AWS, Code Reviews, Agile/Scrum
Leadership	Mentoring, Hiring Support, Technical Interviews, Estimations, Workshops, Architecture Guidance, Cross-team Collaboration

EDUCATION & TRAINING

MSc Computer Science, University of Hertfordshire, UK | 2015 | First Class with Distinction

BSc Music Technology, Staffordshire University, UK | 2002 | Upper Second-Class Honours

AI Engineering Development Path: Following a hands-on roadmap focused on production-grade LLM applications, including Python/FastAPI services, RAG pipelines, LangGraph agents, MCP integrations, structured outputs, evals, and observability. Training supported by Frontend Masters and Udemy Business courses.

Selected AI coursework: Practical Prompt Engineering; AI Engineering Fundamentals; AI Agents Fundamentals v2; AI Agent: From Prototype to Production; Complete Intro to MCP; Practical Guide to Python; Intermediate Python; Open Source AI with Python & Hugging Face; FastAPI; Agentic AI Engineering with LangChain & LangGraph; Ultimate RAG Bootcamp with LangChain, LangGraph & LangSmith.

Earlier learning: Stanford Online programming and databases, Harvard CS50, web development fundamentals, workplace coaching, advanced React, Next.js, NestJS, and frontend architecture.

LANGUAGES

Greek: Native | English: Professional working proficiency, Certificate of Proficiency in English, University of Michigan
